ZapShot

A stereo synth using 2 sweeping quantized square wave oscillators.

How to use:

Start playing the keyboard, you will hear a sound somewhat like the video game "Pong". *Press* the right button and the Blue LED will start flashing. Now ZapShot is in "auto-trigger" mode, and the sound will automatically keep playing until the right button is *pressed* again. This frees up your hands to twist the pots. :)

There are six presets. To select a preset *double-tap* the right button and then press a "white" key.

The following presets are available:

```
Key C - "Pong"
Key D - "Bong"
Key E - "AirRaid"
Key F - "Stuka"
Key G - "Alarms"
Key A - "Quizzle"
```

Types of button presses:

Tap: quickly tap a button
Press: long-press a button
Double-Tap: quickly double-tap a button
